Tests for the Contributor Role

Creating a Lesson, Manual:

- On the Contributor Home Page, click the green Create button; this should open a Create Lesson window.

Creating a Lesson, Automated:

- Positive: Try to create a lesson with category fields filled in correctly
- Negative: Try to create a lesson with a title that is too short. Expect error message: “Title must be between 5 and 100 characters.”
- Negative: Try to create a lesson with a title that is too long. Expect error message: “Title must be between 5 and 100 characters.”
- Negative: Try to create a lesson with a title that is only white space. Expect error message: “Title must be between 5 and 100 characters.”
- Negative: Try to create a lesson with the category, problem, and solution blank. Expect error message: “Category, problem description, and solution cannot be blank.”

Viewing Lessons, Manual:

- When opening theContributor Home Page, a list called “My Lessons” should be there with all available lessons before any search is performed. This list can be filtered or sorted with the Filter & Sort button, providing options such as filtering by category, sorting by date made, alphabetically, or by category alphabetically, all in either ascending or descending order.
- Lessons can be searched for in three different ways: by title, by ID, and by category, or a combination of the three. The ID and category search fields can be accessed by clicking the Advanced Search button, which opens a menu with the search fields.
- Click on a lesson, this should open a Lesson Details window that shows all information for that lesson including its ID.

Viewing Lessons, Automated:

- Positive: Create at least one lesson and retrieve all of a contributor’s lessons
- Negative: Search for lessons by a contributor with no lessons. Expect error message: “No lessons found for contributor [name].”
- Positive: Create at least one lesson and retrieve it by ID.
- Negative: Search for an ID belonging to no lesson. Expect null return.
- Negative: Search for an ID of a lesson belonging to another student. Expect null return.
- Positive: Search for a category and retrieve a filtered list
- Negative: Search for a blank query. Expect error message: “Search query cannot be blank. Enter a valid keyword or category.”

Updating a Lesson, Manual:

- After opening a lesson there should be an Update button, clicking it will open an Update Lesson window. This window is nearly identical to the create lesson window and has the

same requirements, the only difference is that the fields are already filled in with the information contained in the lesson, and these fields can be modified.
- There is also an Add button on the Contributor Home Page; clicking this button will open an add experience window where a lesson, selected by ID, can have additional experience information added to it. These added experiences can also be updated in the Update Lesson window.

Updating a Lesson, Automated:
- Positive: Update a lesson by updating every field.
- Negative: Attempt to update a lesson by making the title blank. Expect error message: “Title cannot be empty. Must be between 5 and 100 characters.”
- Negative: Attempt to update a lesson by making the time spent on it negative. Expect error message: “Time spent must be a non-negative numeric value (hours).”
- Negative: Attempt to update a lesson that does not exist (an ID not currently assigned to any lesson). Expect return false from database since this is not possible manually.

Deleting a Lesson, Manual:
- The user can delete a lesson by clicking on a lesson they wish to delete and clicking the Delete button on the lesson details window. Doing so will show a popup that asks the user if they are sure they wish to delete the lesson, clicking Cancel will close the popup and nothing will happen, clicking Delete will delete the lesson.

Deleting a Lesson, Automated:
- Positive: Make a valid deletion of an existing record.
- Negative: Attempt to delete a lesson which does not exist. Expect return false from database since this is not possible manually.
- Negative: Attempt to delete a lesson with a negative ID. Expect error message: “Lesson ID must be a positive integer.”
- Negative: Attempt to delete a lesson with a non-numeric ID. Expect error message: “Lesson ID must be a positive integer.”
- Negative: Attempt to delete a lesson that is locked. Expect return false from database.
