Brainstorm - Alex

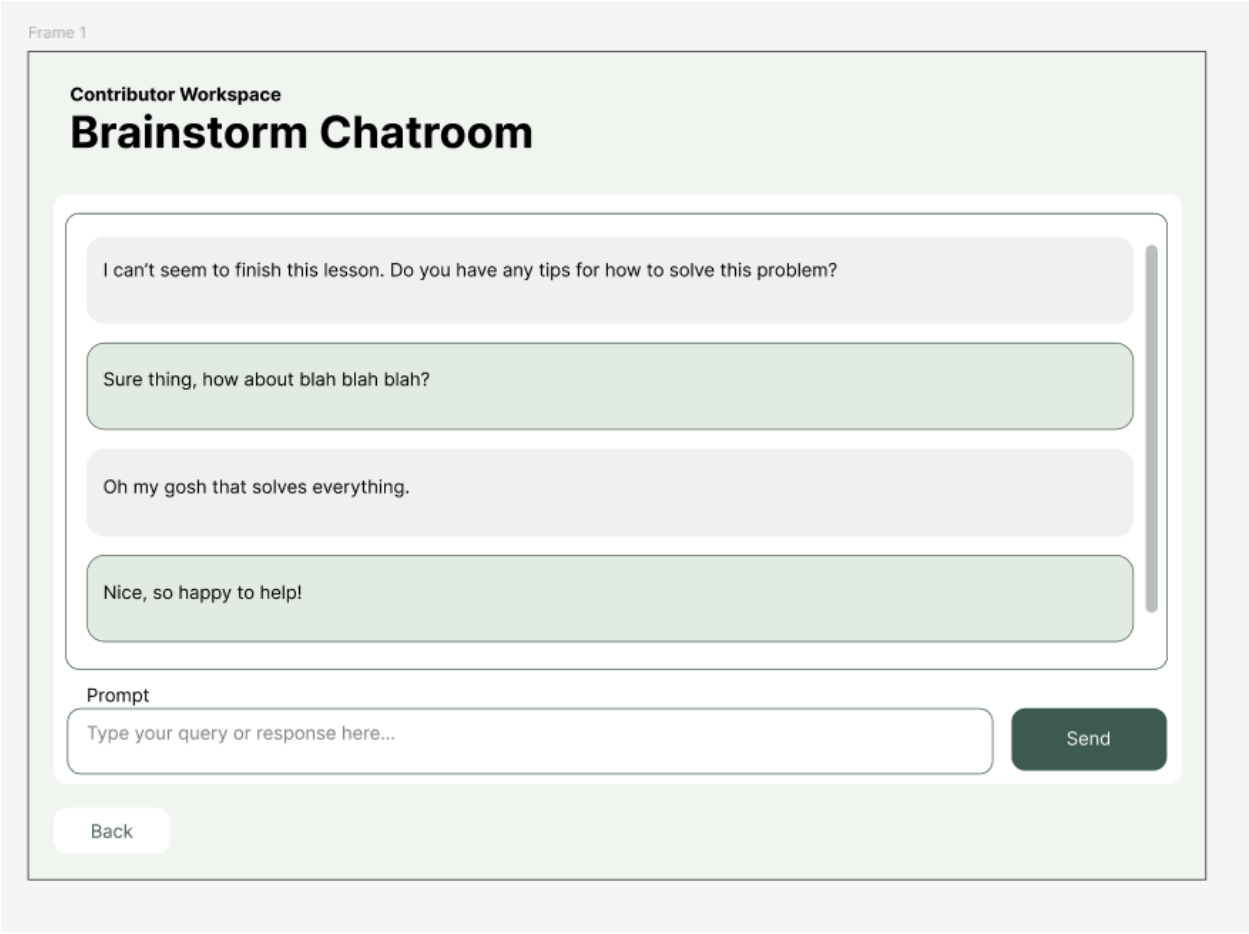

Input Fields:

1. **Chat_System_Prompt** - Our core directions given to the Chat LLM so that it's helpful in the correct context to our users.
2. **Body** - The prompt given by the user.
3. **History** - All prompts and responses given by user and LLM.
4. **Response** - The LLM's reply to the prompts.

Potential Tools:

1. **DeepSeek** - A strong Mixture-of-Experts (MoE) language model that is OpenSource and Free. https://github.com/deepseek-ai/deepseek-v3
2. **Gemma 4** - Another MoE well-suited for tasks like text generation, and reasoning. https://huggingface.co/google/gemma-4-31B
3. **Gemini Developer** - Free tier of Google's Gemini specifically for small projects. https://ai.google.dev/gemini-api/docs/pricing

GUI Mockup:

AI Writing Coach - Alan

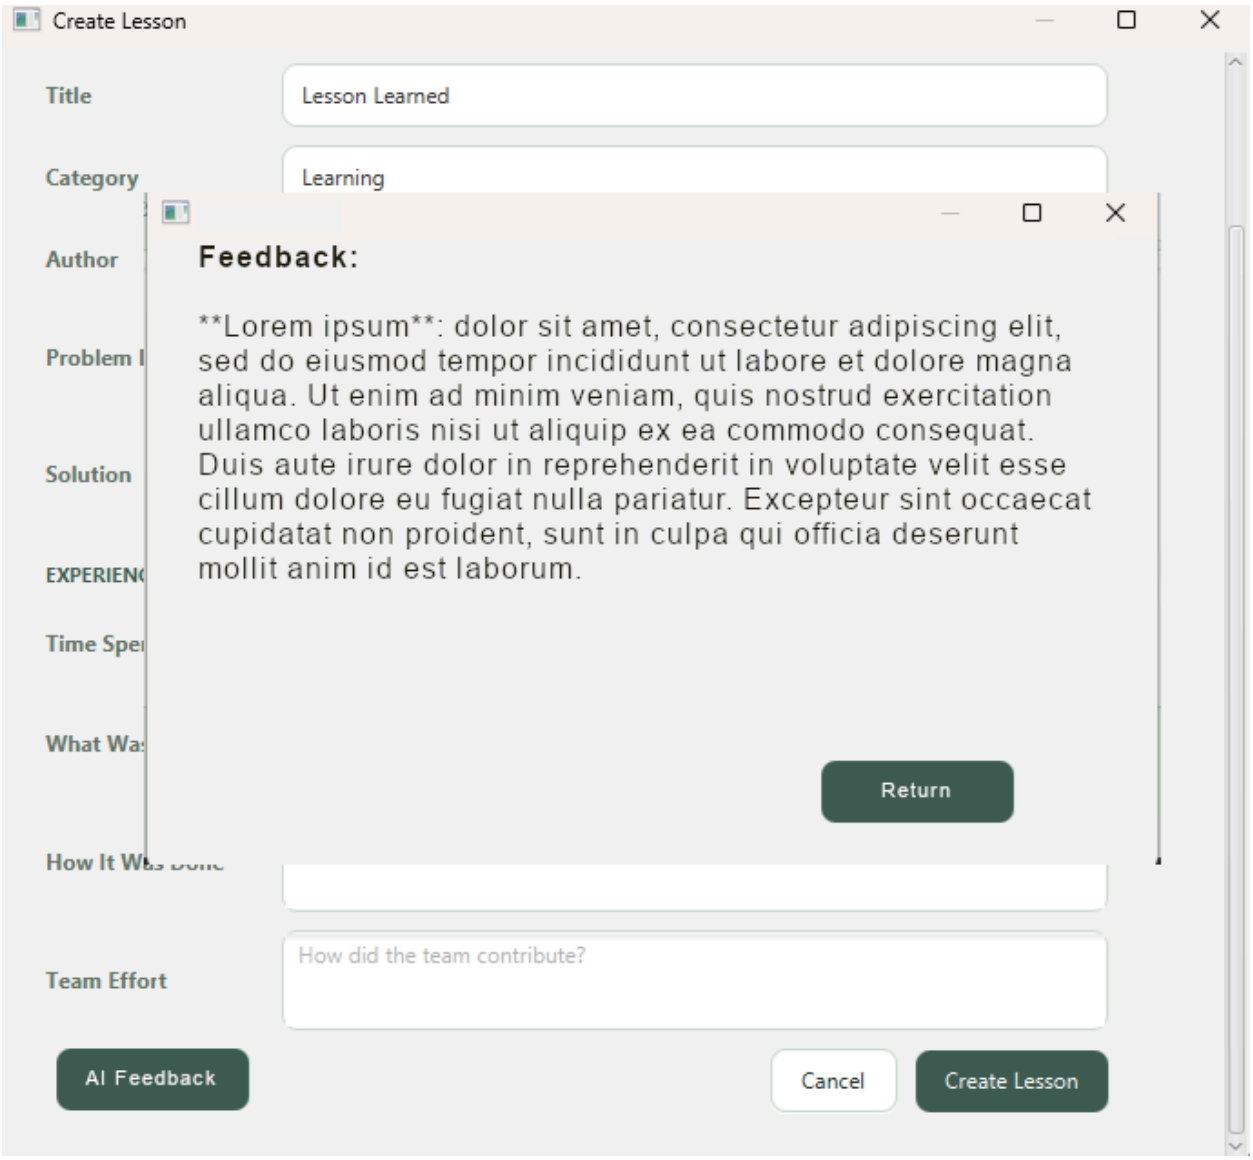

Input Fields:

1. **Writing_Coach_Prompt** - Our core directions given to the Coach LLM so that it's helpful in the correct context to our users.
2. **Title** - The lesson title
3. **Problem_Text** - The first part of the text the user requests coaching on.
4. **Solution_Text** - The second part of the text the user requests coaching on.
5. **Coaching** - The LLM's reply to the request.

Potential Tools:

This will require similar strengths to the Brainstorm function, so consider the same tools.

GUI Mockup:

Search - Caleb

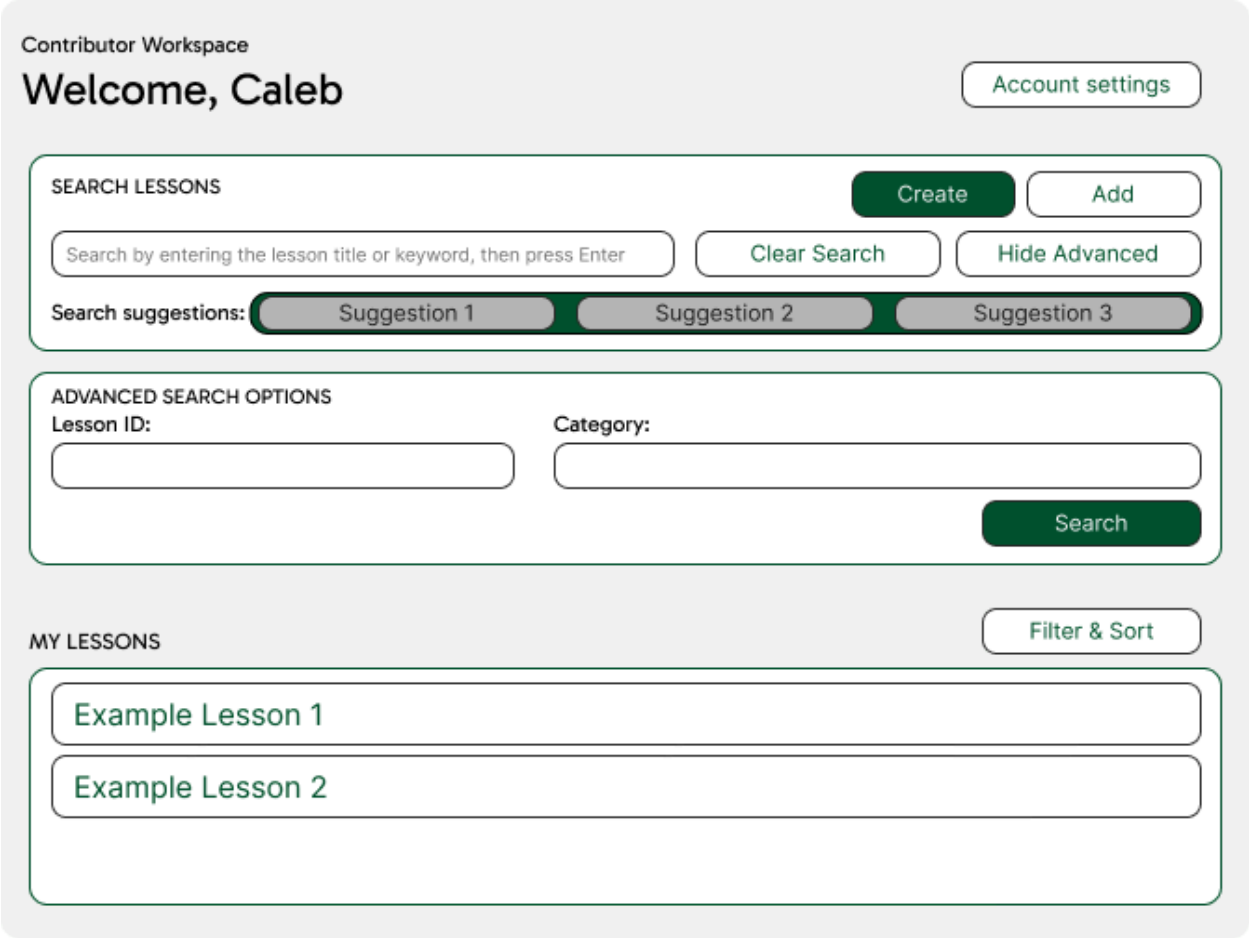

Input Fields:

1. **Search prompt** - What the user enters into the search field
2. **Lesson ID** - Field for advanced search by lesson ID number
3. **Category** - Field for advanced search by lesson Category
4. **Filter & Sort** - Brings up a small menu for various options for filtering and sorting the My Lessons list.
5. **Clear search** - Clear button that clears the search field
6. **Suggestion buttons** - Clicking one of these will automatically search for the suggestion

Potential Tools:

1. **Gemma 4** - a free ai model that would be good for generating suggestions for search prompts to better find lessons. https://gemma.ai/models/gemma-4/

GUI Mockup -

Tags - Krithik

Input Fields:

1. **Options to Selec**t - Multiple Tag options that end user can select
2. **Color Coding** - AI can auto suggest which color code to use

Potential Tools:

1. Gemma 4 - Prompted to provide list with single word tags that are properly formatted for GUI to iterate and display, perhaps option for color coding as well based on tone

GUI Mockup:
