Log In or Invited User Account Setup

Enter your user name and password and then click on the LogIn button

No account? Enter your invitation code and click on the Account Setup button

1. Enter Username
 - a. Acceptable Criteria not needed because we check validation during account creation.
 - b. Has to match a username currently in database.
 - c. At most 40 Characters allowed to be entered in field? That way it doesn't match actual users in case of brute force attack, but also keeps program from accepting too many characters and crashing.
2. Enter Password
 - a. Has to match password for provided username.
 - b. At most 60 Characters allowed to be entered in field? That way it doesn't match actual users in case of brute force attack, but also keeps program from accepting too many characters and crashing.
3. Enter Invitation Code
 - a. Must match an admin created Invitation Code.

User Account Creation.
